

Build an app that displays real-time traffic map

Jacob kiser felker

integrate machine learning to analyze and predict traffic trends

Jacob kiser felker

make sure users data and location is anonymized and never shared without consent

Jacob kiser felker

Collect traffic trend data to make predictions for potential traffic jams.

Jacob kiser felker

could even use machine learning to learn users driving habits making it more personalized

Jacob kiser felker

Recommends best route to take that minimizes travel time and fuel usage

Jacob kiser felker

App would definitely need to be funded to pay for all the of the data storage, possibly make it a subscription app

Jacob kiser felker

voice assistant integration

Jacob kiser

give users ability to personalize voice of assistant making it feel more personalized

Jacob kiser felker

uses local police reports to notify user of car accidents in real time

Jacob kiser felker

another way of making money for the app could be with brand deals with companies like uber for people that don't own a car
